# ABOUT US

Uaná Luminárias is a creative studio that emerged through a simple game of origami, and in the course of unusual experiments began this great project. Through a pure and true design inspired by nature, we seek simplicity and sophistication. Our motivation and work is focused on the creation of lighting pieces that, somehow, can transport us and connect us with nature. Through paper and how light diffuses through it, came the origin of our name Uaná, which in Tupi-Guarani means "Fireflies". Paper preserves the essence of wood, the raw material of fire, which has accompanied our ancestors for thousands of years. For this reason, we chose paper to be also the raw material of our fireflies. We want them to warm up the moments lived with the people we share our lives with.

## OUR WIRES

Our wires are adorned with thousands of rings of re-signified paper, placed by hand - one by one - making them an essential part of the aesthetics of the product. The finishes of the electrical parts (nozzle, switch, plug, plug-holes, bases and sconces) are all made of demolition wood and worked on the lathe, details that bring a perfect combination with the work done on paper.

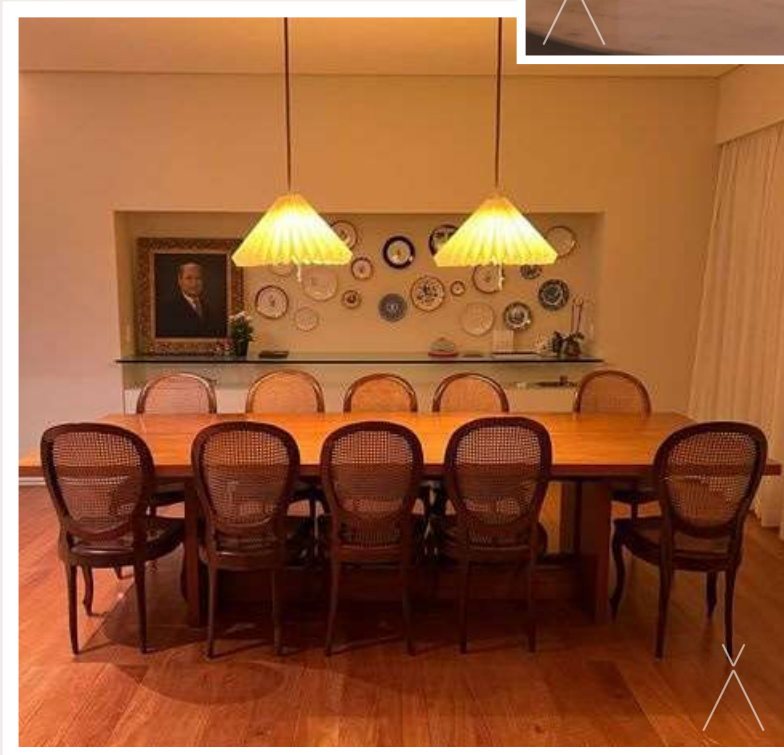

Our light fixtures and table lamps are accompanied by 1 meter of our wires. However, the table lamp Paris is the only piece that has in its composition 1.3 meters of wire.

# ATTACHMENTS

A row of white, textured, geometric light fixtures, possibly made of paper or fabric, arranged in a line on a dark wooden surface. The fixtures are illuminated from below, creating a warm glow. The background is dark and out of focus.
